Symposium

Role of dams and reservoirs in a successful energy transition

A) Dams and reservoirs for hydropower in Europe

- ◆ Opportunity for energy generation and storage
- ◆ Large-scale storage reservoirs
- ◆ Pumped storage reservoirs
- ◆ New energy potential (PV, ...)
- ◆ Efficiency increase of existing schemes

Schweizerisches Talsperrenkomitee
Comité suisse des barrages
Comitato svizzero delle dighe
Swiss Committee on Dams

Symposium

B) Dams and reservoirs for climate change adaptation in Europe

- ◆ Balancing extreme hydrological conditions (floods, droughts)
- ◆ Protection against floods
- ◆ Protection against other natural hazards
(mass movements, glacier lake outburst floods, ...)
- ◆ Irrigation and water supply
- ◆ Multipurpose dams

Schweizerisches Talsperrenkomitee
Comité suisse des barrages
Comitato svizzero delle dighe
Swiss Committee on Dams

Symposium

C) Sustainable dams and reservoirs in Europe

- ◆ Environmental flows
- ◆ Sediment continuum
- ◆ Fish passage
- ◆ Hydropeaking
- ◆ Greenhouse gas emissions

Schweizerisches Talsperrenkomitee
Comité suisse des barrages
Comitato svizzero delle dighe
Swiss Committee on Dams

Symposium

D) How to deal with ageing dams and levees in Europe

- ◆ Dam safety
- ◆ Upgrade and refurbishment
- ◆ Extension and renewal
- ◆ Incorporating new purposes
- ◆ Decommissioning
